Compact forklift with proven AC technology

Hyundai introduces the new BT-9U series 3 wheel battery forklift. The BT-9U series features upgrades to the previous series, including new technology that offers higher efficiency, durability and operator convenience.

Efficiency

- Improved energy efficiency management by applying a Full Electric Power Steering System.
- Powerful and fine-controlable drive performance by Dual Drive System.
- Precise Fingertip control, fully adjustable(OPT)
- Ergonomic designed Directional & Horn switch located on hydraulic controls

Durability

- Application of ZF-Schabmueller Drive System (Drive Axle + Drive motor + Electric Parking Brake) reduces noise level and provides increased reliability & durability.
- Durable proven Dual Micom - ZAPI ACE controllers
- Wet Disc Brakes
- IP43 Motor & IP65 Controller

Safety

- Curve Control feature reduces driving speed when entering a curve
- Speed Adaptive steering feedback increases the driving stability
- Anti-Roll Back feature prevents rolling backwards on a slope
- Electric Auto Parking Brake
- Operator Presence Sensing System

Easy service

- Lateral Battery Exchange System (roller-type) as std.
- Display with integrated Self-Diagnostic functions.
- Quality proven Continental SC18 Solid Tires as std.

Power & Performance

High Efficiency with Optimal Performance

An efficient, smooth running and compact design provides enhanced performance and outstanding productivity.

ZF Dual Drive Train (ZF Drive gear + Schabmueller Drive Motor + Electric Parking Brake)

UPGRADE

ZF is a top global power train manufacturer, well known for reliability and durability. The ZF low-noise dual drive system ensures excellent drawbar pull and short turning radius, and the Schabmueller AC motors are virtually maintenance free. The Wet Brake System offers optimal brake performances with low maintenance needs. An automatic electric parking brake ensures safety and productivity.

Energy consumption Improvement

The energy consumption has been significantly reduced due to newly applied Zapi EPS system and ZF drive train. This adoption is expected to decrease the costs and increase the operating time.

Previous Model (20BT-9) : 8.5Kw/h

Upgraded Model (20BT-9U) : 5.7Kw/h improved by 33 %

※ The figures above are based on Hyundai's test results for a single charge cycle and may divert from actual working conditions.

UPGRADE

EPS (Electric Power Steering) System

The ZF gear in combination with the ZAPI EPS system offers lots of advantages:

- ZF gear system is virtually maintenance free
- Lower energy consumption
- Speed adaptive steering feedback
- Personalized parameter set-up possible

UPGRADE

New ZAPI Controller

The ZAPI ACE controller with dual microm, The capacity of drive controller has been increased for a higher driving performance. The controllers have an IP 65 protection level.

UPGRADE

Auto fork leveling system (OPT)

In order to improve productivity & safety the mast tilting will smoothly stop when the forks are in leveled position

Continental SC18 Solid Tire

Continental SC18 solid tires are equipped as a standard. It ensures low energy consumption and long service life.

Vehicle Performance optimized for working condition

This function optimizes the performance of vehicle for the purpose of work, such as speed of operation, maximum working time and operator's proficiency.

- H mode: High performance mode with fast driving speed and fast lifting speed
- N mode: Normal mode with balanced performance and energy consumption
- E mode: Economy mode maximizing battery autonomy

Easy & Comfort

Optimized Ergonomics & Easy Maintenance

An ideal arrangement of components ensures easy access and convenience for maintenance.

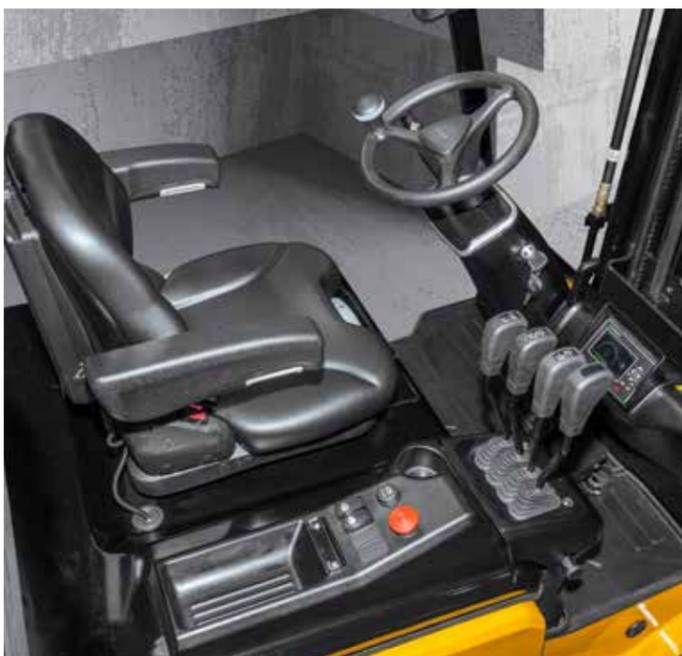

COMFORTABLE WORKSPACE

ADVANCED MONITORING SYSTEM

Spacious operating area

The newly designed driver compartment increases operating space, visibility and overall operator's comfort.

Directional & horn switch on lever (STD)

The electronic directional switch integrated into the lift lever increases the productivity and convenience for the operator

Finger tip control levers (OPT)

Ergonomically designed and adjustable fingertip control levers for improved operator comfort and productivity.

UPGRADE

Easy battery replacement

The lateral battery replacement offers a higher productivity, due to a fast and easy battery exchange, now even faster with guiding strips.

Low-vibration comfort seat

The Grammer seat MSG/65-531 stands for:
- High quality seat with wide seat cushion
- Adjustable suspension, armrests and backrest
- More seat options available

Camera options (OPT)

Two camera options are available:
- Rear view camera, integrated in the cluster, automatically activated.
- Front- and Rear view camera in separate monitor

4.3 inch LCD color monitor

The 4.3 inch LCD smart graphic display shows the driver all necessary information. Its operator menu can be adjusted to 11 different languages. Next to the display is the perfect tool for machine parameter set-up and on-board diagnoses.

Advanced LCD Monitor

- 1 Speed (Digital)
- 2 Steering wheel position and travel direction
- 3 Battery discharge indicator
- 4 Scroll up
- 5 Menu/Scroll Left
- 6 Performance/Scroll right
- 7 Turtle/Scroll down
- 8 ESC/Back
- 9 Enter
- 10 Low brake oil warning lamp
- 11 Error warning lamp
- 12 High temp warning lamp

Full cabin and more (OPT)

A heated full cabin & semi-cabin are available as an option.

Display options

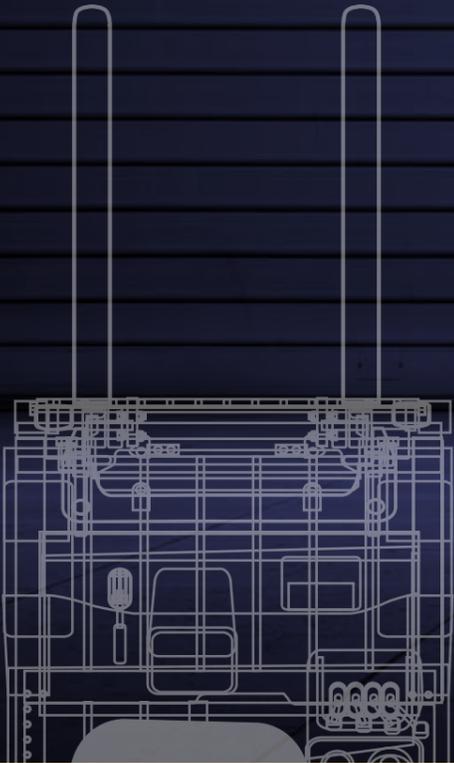

As a standard feature the driver can choose between 2 display layouts. If equipped with the optional load indicator, the loaded weight is shown on the display.

Secure & Safety

Advanced Safety

The safely designed driver's space makes your operating more comfortable.

Some of the photos may include optional equipment.

You can see the video by scanning the QR code.

Excellent visibility for safe operation

Optimized lift cylinder arrangement provides an excellent visibility for the operator. The panoramic mirror and the camera options for increased safety of the driver and pedestrians.

NEW

Red-Zone Light(OPT)

This optional new safety feature projects a safety working area on the floor, in order to warn pedestrians

Lights

LED combination lights and optional LED working lights offer excellent visibility in all circumstances, with a very low energy consumption.

UPGRADE

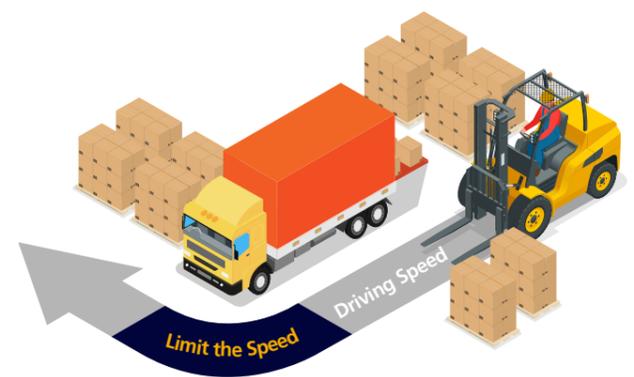

Auto parking brake

The activation and de-activation of the parking brake works automatically, no action required.

Safety features

UPGRADE

Speed Adaptive steering feedback & Curve control

The Speed-Adaptive steering feedback system offers:

- Light steering force on low speed, stands for low driver efforts and high productivity
- Stiffer steering force on high speed, stands for high driving stability and a relaxed drive

The Curve Control system limits the travel speed, based on the turning radius, for a smooth, precise turning operation for the driver.

UPGRADE

Anti roll back system (STD)

Anti Roll-back system offers protection against the machine rolling-back on a slope in combination with exceptional drive-off capabilities.

Steering features

Improved ergonomics by:

- Synchronized steering-knob position
- Reduced steering wheel diameter

High quality Li-ION battery (OPT)

Li-ION batteries ensure a high-performance of the equipment, allowing extended hours of continued operation by use of short high-current opportunity charges. The Hyundai Li-ION battery uses Samsung prismatic NMC cells, providing excellent performance and safety, with virtually zero maintenance. With its 5 Year warranty and a life span twice as long as a traditional lead-acid battery, the TCO will be significantly lower compared to lead-acid batteries.

Benefits of HCE's Li-ION battery

Operating time

- Extended battery autonomy by using short opportunity charges during breaks.
- No need for spare batteries and charging facilities.

Safety

- Multi-layered protection on cell.
- Enclosed battery case made of high-strength steel.
- No hazardous gases during charging process

Maintenance

- No need to replenish distilled water or electrolytes.
- Battery life span at least twice longer than lead / acid sulfuric acid batteries. (over 4,000 cycles)
- No emission of harmful gases and no restriction on the charging location.

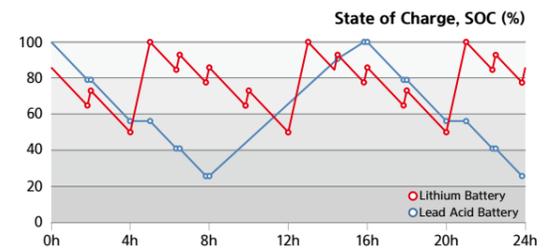

Cost savings

- Charging efficiency higher than lead / acid batteries. (80% → 90%)
- Less downtime due to zero maintenance

- Li-ION battery capacity :
- 15BT-9U : 51.5V/376Ah
- 18/20BT-9U : 51.5V/470Ah
